BRS BQC Redox System

This system consists of a **potentiostat and a mobile or tablet control system** for each of the applications for which it is designed.

With a single device, you can have an **infinite variety of applications** that will be developed *Ad Hoc* for our clients based on their needs.

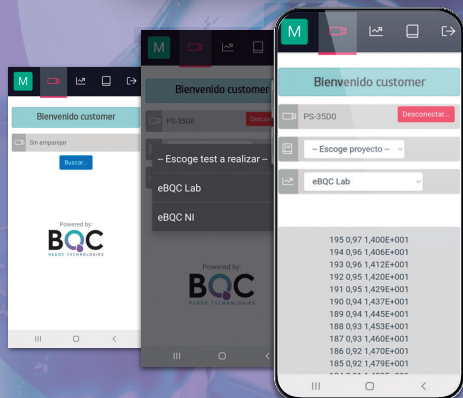

CLOUD
CONNECTION

Both APPs work connected to the cloud with a username and a password per user.

CUSTOMIZATION

Given its versatility, BQC will be able to adapt the App to customer needs, not only in the specific APP, but also in the type of report, logo...
